BIOMAR · HEALTH & SAFETY TRAINING

Reporting incidents, hazards and near misses in Workday

Storyboard v2 for the employee training video. Each frame shows the illustration, the voice-over that plays over it, the action and the camera move. Dashed frames are motion graphics or the Workday screen recording.

Length ≈ 3:55 **Language** English **Frames** 15 illustrations, 4 screen-recording beats, 3 graphics **Audience** all employees, operations first

See it. **Report it.** **Prevent it.**

SCENE 1 Why incident reporting matters 0:00 – 0:28

1A

0:00

VOICE-OVER

> Every day, we work together to create a safe workplace.

ACTION

Production operator checking the line at the control panel. Guards closed, full PPE.

CAMERA

Slow push-in.

1B

0:05

VOICE-OVER

> Most incidents can be prevented if we identify risks early and learn from our experiences. That's why it is important to report safety incidents, including hazards and near misses, whenever they occur.

ACTION

Warehouse operator scanning a pallet from the pedestrian side of the racking.

CAMERA

Lateral slide along the racking.

1C

0:18

VOICE-OVER

> To make it as easy as possible, all employees can report safety incidents directly in Workday.

ACTION

Office: employee opens a laptop to start Workday. Screen faces away; the real Workday screen comes in Scene 4.

CAMERA

Gentle push-in toward the laptop.

SCENE 2 What is a safety incident? 0:28 – 1:13

MOTION GRAPHIC

On screen: “What is a safety incident?”

2·0

0:28

VOICE-OVER

> There are different types of incidents, including:

ACTION

Title card on light-blue background.

CAMERA

Motion graphic

ON SCREEN

On screen: “What is a safety incident?”

2A

0:32

VOICE-OVER

> Personal injuries, such as cuts, burns, strains or fractures.

ACTION

PERSONAL INJURY: operator slips on spilled liquid. Not graphic, no blood.

CAMERA

Quick freeze-frame at the moment of the slip.

ON SCREEN

Label: Personal injury

2B

0:39

VOICE-OVER

> Hazards, such as damaged equipment, spills, blocked walkways or other unsafe conditions that could cause harm.

ACTION

HAZARD: liquid leaking from a cracked hose onto the walkway. No people.

CAMERA

Slow tilt down from the hose to the puddle.

ON SCREEN

Label: Hazard

2C

0:49

VOICE-OVER

> Near misses, where an incident could have resulted in injury or damage but luckily did not.

ACTION

NEAR MISS: an overhanging box falls from the racking and lands more than a metre away. Nobody is hit.

CAMERA

Box falls in real time, short hold on the operator's reaction.

ON SCREEN

Label: Near miss

MOTION GRAPHIC

Cards: Personal injury · Hazard · Near miss → central box: Safety Incident

2D

0:57

VOICE-OVER

> Although hazards and near misses do not always result in consequences, reporting them helps us identify risks and take action before someone gets hurt.

ACTION

The three examples shrink into cards and connect with lines to one central box.

CAMERA

Motion graphic

ON SCREEN

Cards: Personal injury · Hazard · Near miss → central box: Safety Incident

SCENE 3 What should you do? 1:13 – 1:58

3A

1:13

VOICE-OVER

> If an incident occurs, your first priority is always safety. Make the area safe if possible.

ACTION

Operator places a wet-floor sign at the edge of the spill, standing on dry floor.

CAMERA

Medium shot, small push-in.

ON SCREEN

Icon: warning sign

3B

1:24

VOICE-OVER

> Seek assistance if someone is injured. Follow local emergency procedures when required.

ACTION

Colleague kneels next to the injured operator on dry floor and calls for help on the radio. Does not move him.

CAMERA

Static, slight drift.

ON SCREEN

Icon: first aid / radio

3C

1:40

VOICE-OVER

> Inform your supervisor or manager as soon as possible.

ACTION

Operator explains what happened to the shift supervisor; the marked-off spill is visible behind them.

CAMERA

Slow arc around the two.

ON SCREEN

Icon: speech bubble

SCENE 4 How to report in Workday 1:58 – 3:28

4A

1:58

VOICE-OVER

> As an employee, you can report safety incidents directly in Workday. This can help make sure that key information is recorded as soon as possible. You can do it on a computer or directly on your phone, making it quick and easy to submit a report.

ACTION

Operator standing still in a safe area off the traffic route, glove off, phone in hand.

CAMERA

Push-in toward the phone, then cut into the screen.

SCREEN RECORDING

Highlight: Report Safety Incident

4·1

2:12

VOICE-OVER

> To report a safety incident, open Workday and click on “Report Safety Incident” in your menu.

ACTION

Screen recording: open Workday → menu → Report Safety Incident.

CAMERA

Your screen recording, framed in an illustrated phone

ON SCREEN

Highlight: Report Safety Incident

SCREEN RECORDING

Highlight: search bar

4·2

2:20

VOICE-OVER

> Or search for “Report Safety Incident” in the search bar.

ACTION

Screen recording: type the search term in the search bar.

CAMERA

Screen recording

ON SCREEN

Highlight: search bar

SCREEN RECORDING

Location: In which business unit and site did the incident happen? · Incident date and time: When did the incident happen? · Incident type: What type of incident? · Incident location: In what area did the incident happen? · Summary: Describe what happened and leave out names and other personal information

4·3

2:26

VOICE-OVER

> Complete the fields, including: business unit and site, incident date and time, incident type, area, and fill in the summary, describing what happened. Remember not to include names or other personal details in the summary.

ACTION

Screen recording: zoom on each field in turn with its call-out.

CAMERA

Screen recording + call-outs

ON SCREEN

ON SCREEN

Highlight: Submit

4C

3:12

VOICE-OVER

> Once submitted, the report is reviewed by the Health & Safety responsible in your business unit.

ACTION

Safety Partner reviewing the new report and its photo at her desk.

CAMERA

Slow push-in over the shoulder.

SCENE 5 Closing 3:28 – 3:55

5A

3:28

VOICE-OVER

> Every report makes a difference.

ACTION

Another site: two operators walking on the marked walkway outside a coastal feed plant.

CAMERA

Wide, slow lateral move.

5B

3:32

VOICE-OVER

> By reporting incidents, you help protect your colleagues…

ACTION

Supervisor and Safety Partner reviewing the improvement trend.

CAMERA

Static, gentle drift.

5C

3:38

VOICE-OVER

> ...and contribute to a safer workplace for everyone.

ACTION

The whole team in the production hall, inside the walkway.

CAMERA

Slow pull-back.

See it. · Report it. · Prevent it.

Open points before animation

- Voice-over follows the approved script word for word, with one grammar fix in 4A: “As employee” → “As an employee”.
- 3A and 3B run in the order the voice-over gives the actions: make the area safe, then seek assistance, then inform the supervisor.
- All 15 illustrations checked for anatomy (two arms, two hands each), PPE by area (full PPE on the floor, none in the office) and walkway positions.
- Workday beats 4·1 to 4·4 come from your own screen recording, on phone; personal data will be blurred.
- Timecodes are estimates at about 150 words per minute and will be locked once the voice-over is recorded.
