# Portrait Guidelines

Unifying our global look.
Purposeful images are a way of translating our brand personality into a visual projection of our brand identity.

**04**
Do’s + Don’ts

# 01
# Photo Use

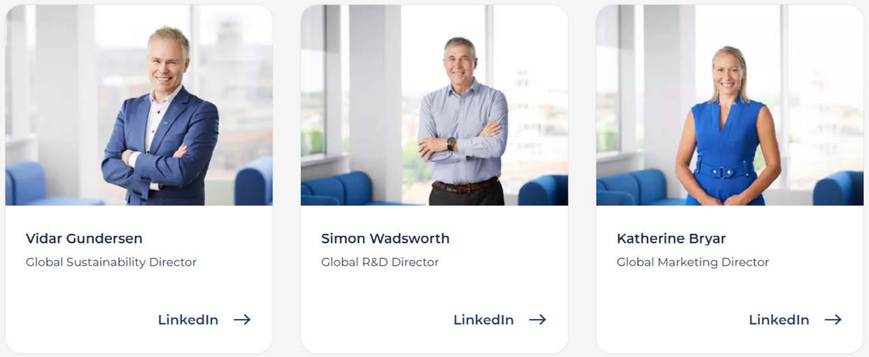

The pictures will need to be seen at small scale, so it is important that the background is light so allow the person to be visible.

Keep in mind, profile pictures are often displayed in circles, so it is important to have enough visual space around the person to allow for good cropping options.

It is nice to have a balance of casual and professional photos, encourage the person to act as natural and relaxed as possible while still staying professional.

Many portraits will be used on the BioMar website, so they need to be consistent so that the site looks professional.

We encourage diverse backgrounds that reflect the persons position. Just keep in mind it needs to be blurred and cool-toned.

Example of portrait use in Social Media.

# Photo Use

The portraits will be used on our website, social media and press releases. So it is important to have a variety of poses.

The poses should be natural and friendly however, it is important that the person is comfortable and well represented.

In terms of body position, it is recommended to lean slightly to the right instead of looking straight on to the camera.

# 02
# Framing

Wearing BioMar colours and BioMar branded items helps to keep the look and feel alive in the photos. Wide shots from the waist up are ideal for cropping later.

A consistent colour palette works well so help unify everyone in a group photo.

Props can be used when it is appropriate.

A blurred, dynamic background adds depth to the portrait as well as letting the person stand out.

# Framing

## Orientation

It is important to include visual space around the key focus so that we have more possibilities for using the photos - ie, cropping.

A mix of poses and framing is required. Ideally in landscape format, with visual space, from the waist up. (This way it can be cropped to other formats).

## Location

The location of the shoot will depend on the appropriate background.
The location can reflect the persons position - for example a blue collar worker might feel more comfortable in the office in a seated position, whereas a commercial person could be shot outside. (The most important is to have a blurred, cool-toned background.)

## Background

It is required that the background is blurred/out of focus with cool tones.

It is recommended that all portraits are taken in the same way in order to be consistent.

## Props

Props can also be used when called for, for example: a receptionist with a headset on ready to take a call.

# 03
# Wardrobe + Props

Classic clothing styles always look good.

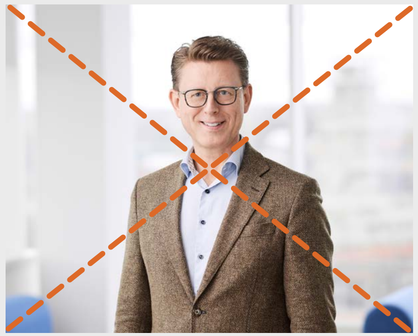

Natural makeup and minimal jewellery look best.

Adding a BioMar pin to a classic suit can be a nice way to add a like branding.

**Do:** Wear blue or grey tones.

**Don't:** Wear warm colours as it does not follow the brand look and feel.

If choosing to dress more casual, make sure to wear a branded BioMar collared polo shirt.

# Wardrobe

In terms of wardrobe, 'smart office' is recommended in the correct colour tones. Simple, conservative, and classic clothing styles work well, the clothing should naturally match their position.

If casual, a BioMar Branded polo shirt should be worn.
Solid tones and colors, as well as simple designs, are always a good choice.

Avoid ***RED, yellow, pink*** or ***orange*** clothing.
Instead opt for blue, black, grey, white, and natural notes. Shades of blue is preferable.

## Tips:

- *Avoid clothes with prints, large lines, stripes, or busy patterns, as these can be distracting.*
- *Avoid makeup products that shimmer or sparkle.*
- *Avoid bright or neon colors.*
- *Avoid clothes with visible branding or decals. EXCEPT BioMar Branded items or the customers brand.*
- *Stick with neutral blue tones and classic clothing styles.*
- *Jewellery should be kept minimal and simple.*
- *Avoid **RED, yellow, pink** or **orange** nail polish, instead have neutral tones or natural nails.*
- *Avoid over-styled hair as it may not look natural.*

# 04
# Do’s + Don’ts

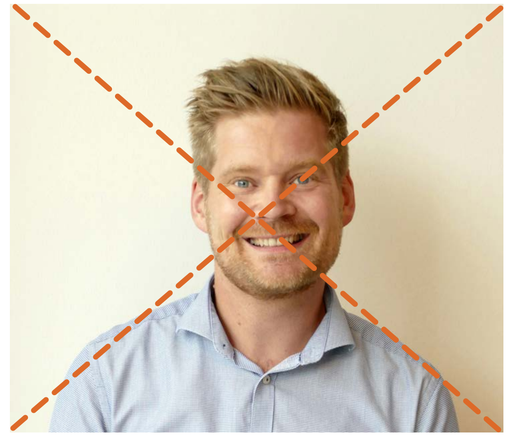

**Do:** Shoot from the waist up with good visual space for cropping and a blurred background.

**Don't:** Use black and white, poor resolution and too tightly cropped photos.

**Do:** Pose facing slightly right, with a light, cool-toned dynamic, yet blurred background.

**Don't:** Face directly into the camera with a warm-toned flat background.

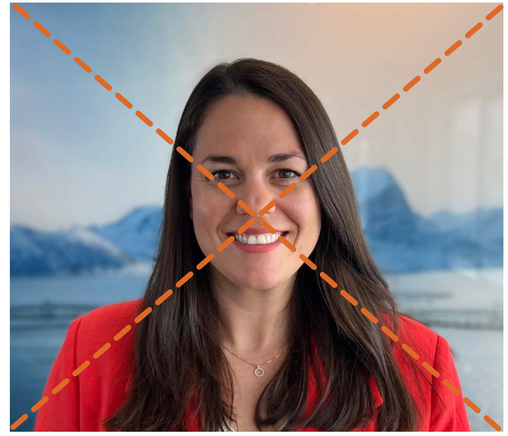

**Do:** Take multiple poses with different facial expressions. Show the person comfortable and natural.
Don't: Wear warm coloured clothing.

**Do:** Wear BioMar colours against a cool-toned, blurred background with natural make-up.

**Don't:** Wear RED! Or face directly into the camera with warm-tones in the background.
