# BioMar Colours

**BioMar Blue**
RGB: 31 62 119
CMYK: 100 84 26 12
PANTONE: 654 C
HEX: #1f3e77
NCS: S 7020-R80 B

**Ocean Blue**
RGB: 4 113 173
CMYK: 87 50 8 0
PANTONE: 285C
HEX: #0471ad
NCS: S 2065-R90B

**Sky Blue**
RGB: 146 206 232
CMYK: 50 0 6 0
PANTONE: 297C
HEX: #92cee8
NCS: S 0540-B

**Crisp Blue**
RGB: 195 228 239
CMYK: 25 0 3 0
PANTONE: 277C
HEX: #c3e4ef
NCS: S 0520-R90B

**Leafy Green**
RGB: 151 209 48
CMYK: 56 0 92 0
PANTONE: 368C
HEX: #97d130
NCS: S 2070-G40Y

**Wheat Yellow**
RGB: 234 179 24
CMYK: 10 28 91 1
PANTONE: 115U
HEX: #eab318

**Shrimp Orange**
RGB: 221 105 40
CMYK: 8 68 91 1
PANTONE: 166C
HEX: #dd6928

**Colour Settings**
It is extremely important to make sure that you are using the correct colour settings in the Adobe Suite when doing any design work for BioMar as the colours will display differently in different settings.

(Europe General Purpose 3)

**How to find colour settings?**
To find the colour settings in the Adobe programmes (InDesign, Photoshop, Illustrator) go to;

Edit > Colour Settings > Settings > Europe General Purpose 3.

Working Spaces:
RGB: sRGB IEC61966-2.1
CMYK: Coated FOGRA39 (ISO 12647-2:2004)

**Colour matching**
Always consult your printing supplier for the most accurate reproduction of brand colours. To help, we have created a colour swatch pull-out on the opposite page. This page is intended to be used when proofing colours.

**RGB vs CMYK**
Web design uses colour as RGB (red, green, blue)
Print design uses colour as CMYK (cyan, magenta, yellow, black.)

Please make sure that you select the correct colour format for your output when you start your document.

If you convert your files from RGB to CMYK (or vice versa) it will result in inaccurate colours.

# Grey Colour Palette

**Percentages %**
All of the BioMar Greys are created from percentages of black.
This is for ease of use and to create a neutral-toned grey palette.

It is very important to always proof the grey tones to ensure they are neither too 'cool' or too 'warm'.

Recommended Values *

**Use of Black**
BioMar is blue.
In general, dark coloured text should be BioMar Blue.
In cases where BioMar Blue cannot be used, Black 80% or Black should be used.

**Black 80% ***
RGB: 87 87 86
CMYK: 0 0 0 80
PANTONE: 172-14 C
HEX: #575756

# BioMar Shapes

Feed is what we create.
The BioMar Shapes are a friendly, abstract visual representation of the raw materials in our feed.

# BioMar Graphic Elements

The BioMar graphic elements are a distinctive set of visual assets that strengthen our brand identity and create consistency across all communications.

They consist of two complementary categories:

**The BioMar Swoosh:** Derived directly from the BioMar logo, the swoosh is our primary graphic element. It symbolises movement, progress, and continuity, creating a strong visual link back to the BioMar brand while adding energy and direction to layouts.

**Aquaculture Graphics:** Inspired by the world of aquaculture, these abstract graphics represent the species we support and the feed at the heart of our business. They add texture, depth, and visual interest while reinforcing BioMar's expertise and connection to the industry.

Together, these elements create a cohesive visual system that is recognisably BioMar. Used across a wide range of applications, they bring structure, movement, and character while maintaining a consistent and unified brand expression.

(See following pages.)

The BioMar graphic elements should never be modified, distorted, or used in a way that compromises the integrity of the BioMar brand.

**The BioMar Swoosh**

**Aquaculture Graphics - Fish**

**Aquaculture Graphics - Shrimp/Krill**

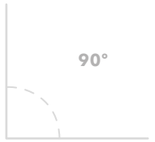

**Aquaculture Graphics - Feed/Pellet**

# Watermarks

The watermarks have been designed in a way where they can be used in any orientation and still remain visually appealing.

(Shown left)

**Use**
The watermark is intended to bleed off the page, and sit in the background, behind all other design elements and typography.

(Refer to Watermarks Usage)

**Size & Scale**
The watermarks are scaled according to the media and format. The files are made to fit a standard A3 format (297mm x 420 mm) and can be scaled proportionally according to the required format.

**Organic Watermark Set**
We have created a set of organic watermarks that consist of 12 different layouts.

They pull from the raw materials and give a wide range of variety for textured backgrounds in all different types of applications.

(Shown right)

**Icon Watermark Set**
The icon watermark set focuses on fish, shrimp/krill and feed pellets in 2 different layouts per element.

(Shown over the page)

Icon Watermarks - Pellets

Icon Watermarks - Pellets 2

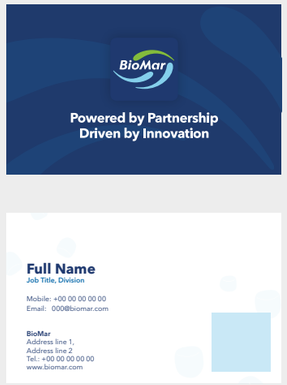

## Orientation

**Horizontal/Landscape**
As a general rule, the icon watermark set is to be used only in landscape layouts.

(In some cases the general rule will not apply)

**Example use: Business Card**

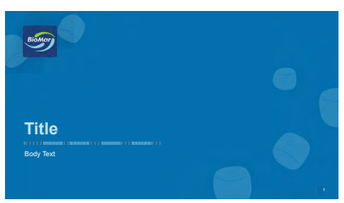

### Colour Variations

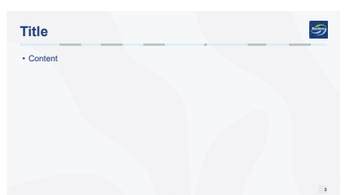

Light Grey 01 Dark Grey 02 Sky Blue 03 Ocean Blue 04 BioMar Blue 05

### Example Use: PowerPoint

## Variations

**Colour**
There are 5 different colour variations for the watermarks. These colour combinations are predefined and should never be altered or changed.

The Grey tones are intended for behind body text and to be used in cases where more interest is needed instead of a plain white background.

(See next page)

The Ocean Blue and Sky Blue watermarks can to be used as page breaks or similar, as shown in the structure of this document.

The BioMar Blue watermark can be used in place of a plain dark blue background, back pages and the corporate sign off.

(See next page)

## File Names

In order to easily find the file and colour you want, the files have been labeled accordingly.

**Organic Watermarks - Shape 1 CMYK-01**

- The Series
- The Shape Number
- The Colour Setting
- The Colour Number

Sky Blue 03

Light Grey 01

Ocean Blue 04

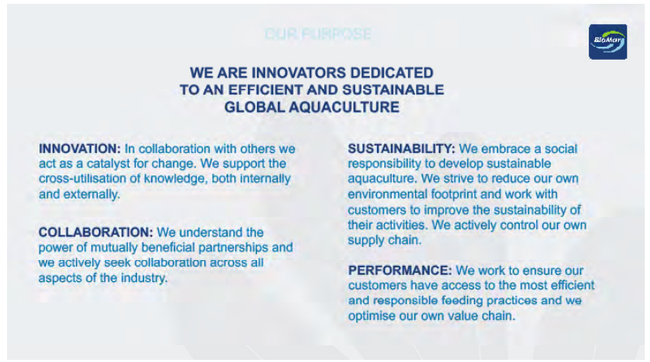

Dark Grey 02

BioMar Blue 05

Note:
If none of these variations fits your projects needs, please contact Global Marketing for a solution.
** Please do not attempt to re-create or edit the watermarks.**

# Usage

**Textured Backgrounds**

The light Grey watermarks work best behind large bodies of text to add a light texture and create a sense of movement on the page.

If selected strategically, the watermarks can also draw attention to different areas of the page.

Coloured watermarks should never be used as a background behind large bodies of text.

**Corporate Sign off**

We recommend using the BioMar Blue watermarks as the end page corporate sign off. It works well for the background behind the logo, tagline and footer text.

Note:
It is best to choose a watermark that cuts through where the logo is so that it stands out and does not ‘disappear’ into the dark blue.

(Removes the need for adding an outer glow to the logo)

**Business Card**

The BioMar business card uses both a dark organic shape watermark and the icon layouts.

**Section Pages**

We recommend using the BioMar Blue watermark or an approved water photograph as a cover page when appropriate. The Ocean Blue watermark can be used as a section break page, and the Sky Blue watermark a sub-section page.
